orange, black, and red. They're known as "true" bugs (hemiptera) and have some distinct features. How to Get Rid of Milkweed Bugs (Naturally) |

BugWiz Milkweed Bug Control. Unless you're a milkweed plant farmer, milkweed bugs in the garden don't require any type of control. They're generally considered a beneficial insect because their feeding activity can end the life cycle of milkweed plants. This helps to control the milkweed plant, which can be invasive but is also an important food source and breeding location for monarch butterflies. Milkweed Bug Information - Are Milkweed Bugs Harmful As with all true bugs, large milkweed bugs undergo incomplete or simple metamorphosis. After mating, the females
