Loons The loons (North America) or divers (United Kingdom / Ireland) are a group of aquatic birds found in many parts of North America and northern Eurasia. All living species of loons are members of the genus *Gavia*, family Gaviidae and order Gaviiformes. Loon - Wikipedia Common Loons are large, diving waterbirds with rounded heads and dagger-like bills. They have long bodies and short tails that are usually not visible. In flight, they look stretched out, with a long, flat body and long neck and bill. Their feet stick out beyond the tail (unlike ducks and cormorants), looking like wedges. Common Loon Identification, All About Birds, Cornell Lab ... The common loon or great northern diver (*Gavia immer*) is a large member of the loon, or diver, family of birds. Breeding adults have a plumage that includes a broad black head and neck with a greenish, purplish, or bluish sheen, blackish or blackish-grey upperparts, and pure white underparts except some black on the undertail coverts and vent. Common loon - Wikipedia A long-bodied, low-slung diver. Many people consider the loon a symbol of wilderness; its rich yodeling and moaning calls, heard by day or night, are characteristic sounds of early summer in the north woods. In winter, silent and more subtly marked, Common Loons inhabit coastal waters and large southern lakes.
